

Laser Beams!

Lesson Idea:

This game has many different names. The idea is for children to work in teams to assist each member through the gaps that the ski rope creates. We have used this game for an event called Mission Himpossible but you could adapt it to fit your theme.

The "laser beams" can form part of an obstacle course or a stand-alone game.

Items needed:

- Ski rope and an obstacle to tie it to

Game instructions:

1. Leaders set up the ski rope in criss-cross patterns with different sized holes.
2. Children line up in front of the web. Leader asks each child if he chooses to accept the mission: to "Go and tell others about Jesus"; to "pray for others" or to "Give to others" and if they choose to accept the mission they can pass through the web.
3. Team members must then help each other through different gaps of the web without touching, if possible.
4. Each gap can only be used once.
